I looked at the report at Robin's desk. There's nothing much above the MDL and the same levels reported in the samples are in the field and equipment blanks. The raw data needs to be reviewed to see what it looks like. You can't tell much else from the report.

I'll be in the lab or helping John with extractions in G206 if you need any more info, but there's nothing else I can say based on just looking at the report

We need to discuss this report. Do you have time?

First set of data from Test America is in. This is the short report. When they send the level 4 report, I will let you know and it can be assigned for validation. The data is in J:\ESAT Downloaded data\Dimock\Test America and is the file with "..level 2 report..." in the file name.

The results are for ethylene glycols + glycols and there are some low level (between MDL and RL) hits.

Good morning,

Attached are your results related to the above project, samples received 2/1/12. Level IV/CLP-like package to follow.

Thanks,  
Brian
